

MULCH MAT

MULCH MAT is a top quality spun bonded polypropylene fabric which has high water and air permeability, together with good tensile and tear strength and a weight of just 30gsm.

MULCH MAT is micro-porous and has no visible holes or gaps, which enables much greater water permeability than woven weed control mats.

MULCH MAT is UV stabilised, however it is recommended the mulch mat is covered to ensure a longer life.

MULCH MAT is available in black

PRODUCT	COLOUR	ROLL WIDTH	ROLL LENGTH
30gsm	Black	1.8m	50m

SPECIFICATION

Construction	Spun bonded Polypropylene
Weight	30gsm or 3.5kg
UV Stabilized
