

DOMESTIC BIRDNET

ABSHADE® Birdnet is especially manufactured to keep birds and bats out of valuable crops and thereby stopping the expensive losses they can inflict.

The domestic range of both the 15gsm Birdnet can be applied directly as a reusable drape over net. **ABSHADE®** handy pack birdnets are light enough that direct contact with the indented tree or vine will not cause any permanent damage and will be strong enough to keep out the most persistent predators.
