Commercial Staples	25	Galvanised Steel	150mm	30mm	4mm
	100				

Greenhouse Repair Tape

Greenhouse Repair Tape can help repair minor tears and punctures in Solarfilm and Solarshield Hortcover products. It is UV stabilised and has a very strong all weather adhesive.

Specifications	
Width	Length
48mm	25m
96mm	25m

Not suitable for joining two pieces of Solarfilm or Solarshield together

Frame Guard Tape

Frameguard Tape prevents wearing caused by the film rubbing against the frame of the structure. It has an adhesive side for attaching to the frame, and an opposing felt side to protect the film from the structure.

Specifications	
Width	Length
24mm	15m
30mm	15m

Frameguard Tape must be used with all plastic greenhouse covers supplied by ATS, otherwise, warranties will be voided.

Abshade Fixing Pins

Use Abshade Fixing Pins to join two panels of cloth together or to attach shadecloth to a frame or wire.

- When joining two panels together, overlap the cloth by 20mm and insert pin every 150mm along the join. The pin must firstly puncture the top side of the fabric, come out the bottom side, and then be pushed back through the top approximately 20mm away from the original insertion.
- To attach shadecloth to wire or frame, fold shadecloth around the wire and proceed as above.

Abshade Fixing Pin Applicator

Fixing Pin Applicators are recommended to apply Abshade Fixing Pins on larger jobs. They are designed to hold the pin in a stainless steel sheath whilst easily piercing through the cloth.

Specifications	
Product	Pack Size
Shadecloth Fixing Pins	50
	500
Fixing Pin Applicator	Each with 50 free pins
